Addendum

I am adding three drawings: Drawing #15, 15-B and Drawing #16 to my application for a patent.

Detailed Description of the Invention (14 drawings) The first 11 drawings were previously submitted with original patent application and one other time of submission.

Mat Mate™ is a one-piece design.

Drawing of Figure 15 and Figure 15-B of the Mat Mate™ is constructed the same on the front as well as the back of the invention. It is approximately 45 inches long and 22 inches wide, but can be enlarged or made smaller depending upon the size of the mat that it is covering. Mat Mates™ are not limited to any particular size of mat. Mat Mates™ are coverings for mats.

The opening on the Mat Mate™ in drawing #15 and 15-B is left open at the top, but it has a band on it for a clean finish. The added length of the band onto the Mat Mate helps to keep the mat enclosed inside the Mat Mate™.

Drawing of Figure 16 of the Mat Mate™ is constructed the same on the front as well as the back of the invention, except it is constructed from knit fabric and gives a snug fit on the mat. It is approximately 45 inches long and 22 inches wide, but can be enlarged or made smaller depending upon the size of the mat that it is covering. Mat Mates™ are not limited to any particular size of mat. Mat Mates™ are coverings for mats.

The opening on the Mat Mate™ in drawing #15 and 15-B is left open at the top, but it has a band constructed of the same knit fabric but cut narrower than the actual Mat Mate so that it can fit snugly at the opening of the Mat Mate and still have a clean finish. The added length of the band onto the Mat Mate helps to keep the mat enclosed inside the Mat Mate™.
